## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-19 and 24-42, drawn to providing a centralized employee stock plan administration, that provides a workflow interface screen and workflow requests, and uses statistics. **(see class 705, subclass 10)**
  - II. Claims 20 and 43, drawn to a centralized employee stock plan administration that includes an administrators dashboard interface. **(class 705, subclass 8)**
  - III. Claims 21 and 44, drawn to a centralized employee stock plan administration that provides a navigation element that allows a user to access participant information. **(class 715, subclass 700)**
  - IV. Claims 22 and 45, drawn to a centralized employee stock administration plan that includes a tax profile. **(class 705, subclass 31)**
  - V. Claims 23 and 46, drawn to a centralized employee stock administration plan that includes a report interface screen. **(class 705, subclass 236)**
2. The inventions are distinct from each other. Inventions I, II, and III are directed to different methods and systems. The related inventions are distinct if the (1) inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function or effect; (2) the inventions do not overlap in scope, i.e. are mutually exclusive; and (3) the inventions as claimed are not obvious variants.

See MPEP 806.05(j). In the instant case, the inventions as claimed, are five different methods and systems for a centralized employee stock administration plan.

Futhermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

3. Because these inventions are independent or distinct for the reasons given above, there would be a serious burden on the examiner if restriction is not required since the inventions require a different field of search (see MPEP 808.02), restriction for examination purposes as indicated is proper.

4. Applicant is advised that for this reply to this requirement to be complete, Applicant must include (i) an election of species or invention to be examined even though the requirement can be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
